SARA Quiz Questions Grading Rubric

You need to create 3 multiple-choice (MC) questions, each with four options. Clearly indicate which of the four options is correct. Note that "good" options are those that are not obviously bogus (though you are allowed to have **one** that is - just to add some humor :) Writing great MC questions is really challenging! I strongly recommend having someone you know (and trust to be honest) give you feedback on whether your questions and answers are clear and unambiguous. Each question will be scored as follows:

the question was clear (.5)

the question was written without grammatical or other related issues (.5)

the answer was easy to get but not directly printed on a slide (.5)

at least 3 of the 4 options provided were "good" options (.5)

the correct option was clearly indicated (.5)

I did not have to do any major revisions (.5)

+1 if I get the sense that you really tried and that the questions were not simply slapped together at the last minute :)
